- **Russian:** Elementary

ABOUT

As a Computer Engineering student, I am eager to enhance my skills, gain experience, and expand my network. I actively pursue self-directed projects, attend industry events, and engage in coding competitions to continuously learn and adapt. With a strong foundation in programming, algorithms, and data structures, I am a quick learner. Possessing excellent communication and teamwork skills, I thrive in collaborative environments. I am excited to explore internship opportunities, projects, and mentorship programs to contribute to technological advancements and my personal growth.

PERSONAL PROJECTS

• CALCULATOR APP

Developed in Android Studio with Kotlin

This is my first app with Kotlin and Android Studio. It is a basic calculator app with a beautiful UI.

• FLAG QUIZ APP

Developed in Android Studio with Kotlin

The app presents you with quizzes where you have to correctly identify flags by their corresponding countries.

• DRAWING APP

Developed in Android Studio with Kotlin

A basic drawing app that allows you to draw with different colors and brush sizes, import a background, undo-redo and export the drawing.

• WORKOUT APP

Developed in Android Studio with Kotlin

A fitness application that provides you with exercise demonstrations, calculates your BMI, stores your data, and etc.

• NOTES APP

Developed in Android Studio with Kotlin

Personal project with a simple UI/UX design, mainly made to comprehend how to store and retrieve data from database effectively.
