OBJECTIVE

AI-focused developer with a background in software engineering and intelligent systems. Skilled in applying **machine learning** and **AI technologies** to build practical, data-driven applications and tools. Passionate about exploring the intersection of AI, software engineering, and user experience to create innovative, high-impact solutions that solve real-world problems.

EDUCATION

Dokuz Eylul University, İzmir

2022 - Present **B.S. in Computer Engineering (100% English)**

- Coursework includes **Data Structures, Algorithms, AI, Operating Systems, Software Engineering.**
- **SAT Score** - 1460
- **TOEFL IBT Score** - 97/120

EXPERIENCE

Co-Founder and Software Developer at SparklesAI

NOV 2024 - APR 2025

- AI-based game development startup accepted by İTÜ Çekirdek, TÜSİAD(Bu Gençlikte İş Var) and TÜBİTAK 1812 (BiGG).

VOLUNTEERING EXPERIENCE

IEEE Computer Society Project Team Member

Izmir/Turkey

OCT 2022 - MAR 2025 (2 Year 5 Months)

- Played an active role in organizing and managing large-scale tech events such as **CSConnect, DETECH'23, CODEU DETECH'24, and DETECH'25.**
- Collaborated with cross-functional teams to plan event logistics, coordinate schedules, and ensure smooth execution.

PERSONAL PROJECTS

Deep Researcher AI Agent

- Built an agent pipeline: Planner Agent → Search Agent → Writer Agent to produce a 5–10 page markdown report.
- Added Email Agent delivery via SendGrid and per-run tracing links.

Autonomous Trading AI Agents

- MCP-based trading agents running trade and rebalance loops, tracked in Gradio with SQL history.
- MCP servers provide tools for accounts, market prices, and research.

Agentic RAG

- Built an agentic RAG system with OpenAI Agents SDK, ChromaDB, and Gradio.
- Added semantic retrieval, reranking, and answer self-evaluation for QA tasks.

RAG Evaluator

- Built a RAG evaluation framework with Chroma, LangChain, OpenAI.
- Evaluated retrieval and generation quality using metrics and benchmark test sets.

Licenses and Certifications

- **Advanced Learning Algorithms** — DeepLearning.AI
- **Improving Deep Neural Networks: Hyperparameter Tuning, Regularization and Optimization** — DeepLearning.AI
- **Supervised Machine Learning: Regression and Classification** — DeepLearning.AI
- **Unsupervised Learning, Recommenders, and Reinforcement Learning** — DeepLearning.AI
- **Machine Learning with Python** — IBM
- **AI Engineer Agentic Track: The Complete Agent & MCP Course** — Ligyency

Skills: • OpenAI Agents SDK • Multi-agent orchestration • Tool calling • Run tracing • RAG • MCP • SendGrid • Python • Pandas • NumPy • REST APIs • SQL • NoSQL • Docker • AWS • Azure • Git • GitHub • **Languages:** • English (C1) • Russian(B1) • Turkish (Native) • Azerbaijani(Native)
